

Portable Thermal Printers

QTP - The Incredibly Tiny Thermal Printer

Based on Axiohm's (France) remarkably innovative Aster on mechanism, the QTP features an ergonomic cover-opening system with an advanced locking mechanism to prevent the door from opening unexpectedly. Moreover, its innovative design ensures improved protection against spills and dust that might interfere with the printing process.

Supporting a dual RS 232 & TTL connection, this 5V-printing device responds to the printing needs of many applications (industrial automation and instruments, POS systems, ticketing, gaming and entertainment, automotive diagnostics, test and measurements, process control, portable receipt printing). Its small size (75 mm (w) x 84 mm (d) x 59 mm (h)**) helps in easy integration too.

Features such as a translucent cover for monitoring paper consumption, LED power indicator, Clamshell™ paper loading, optional battery pack, and small size make this a truly remarkable low cost thermal printer.

The QTP - The Incredibly Tiny Thermal Printer

Weight: Only 200 gms
Over 500,000 receipts*
European quality at Chinese prices
Warranty support in India
Optional battery pack

SPECIFICATIONS:

Printing Speed	mm/s	60
Printing width	mm	48
Resolution dots	mm	8
Number of dots	dots	384
Paper width	mm	58
Paper thickness	µm	60-80
Paper loading		Clamshell
Operating Voltage dots	V	4.5-8
Head pulse Life	pulse	1x10⁸
Mechanical reliability	km	50
Interface		RS232 / USB
Dimension (WxDxH)	mm	75 x 84 x 59*
Weight	gm	200
Operating temperature	°C	0 to 50
Cutter		Tear Bar
Optional features		Battery
